15-Year-Old German Shepherd Gets “Second Life”

“Advanced Cetyl M[®] has worked a miracle for our 15-year-old German shepherd Idgy. She was limping badly because of hip dysplasia. Her hips would just collapse sometimes. We tried giving her straight glucosamine, but it had no effect. We put her on Advanced Cetyl M[®] and it has given her a second life. It’s an amazing product. And she really likes the flavor of the chewable tablets. Eats them right up, no problem. Thank you for having such a great product.”

Visible results in less than a week

“Advanced Cetyl M[®] has been very beneficial for my dog. Moe is ten years old and weighs 72 pounds. Moe had been limping from a spinal problem and his hips were tightening up. I put him on a course of Advanced Cetyl M[®] and started noticing changes in just under a week. I noticed definite improvement in three weeks. I’m really happy with Advanced Cetyl M[®] and recommend it to my friends and neighbors.”

Better than I ever imagined

“Plagued with chronic pain from severe hip dysplasia, I had pretty much given up hope on my 9-year-old Rottweiler. Tried hip surgery and months of therapy in the pool. Rimadyl and glucosamine tabs helped some but not near enough. It was about time to let her go when I heard about Advanced Cetyl M[®]. Three tablets in the morning and three at night and I could see she was feeling and moving better after only 10 days. That was over a year ago. No, she doesn’t chase rabbits any more but she’s comfortable and getting around better than I ever imagined. Glad to have her back. Thanks Cetyl M[®].”

She's like a different dog—sweet sixteen and cruising

"I have had my dog Sheba for 16 years. She's healthy in every way except for her arthritis, and now, thanks to Advanced Cetyl M[®] Joint Action Form, she's going strong again. I had painfully decided to schedule an appointment to put her down before I stopped at your booth at the Equine Affaire in Pomona. Well, she is cruising along now and her personality is back. I'm dumbfounded and so are all the people on the ranch. We're all talking about how great she looks and how she acts like a different dog. I don't know how much extra time we'll have together, but she is certainly a happier camper. And so am I!"

Beating me again to the back pasture

"My wife ran over my dog Pete three years ago, and he's been lame ever since. Before the accident he would run to beat me to the back pasture to feed. However, since he was run over, he's been taking his good old easy time getting back there. On January 22, 2005, I started him on Advanced Cetyl M[®] pet tablets and, after about two weeks, he started once again beating me to the back pasture. He is full of piss and vinegar, again. Oh, and I'm also seeing good results with my horse after just 5 weeks on the Advanced Cetyl M[®] horse product you sent me."
